

WE ENCOURAGE YOU TO JOIN THE ONLINE MEETING IN ORDER TO TAKE FULL ADVANTAGE OF INTERACTIVITY SUCH AS POLLS, CHAT, AND HAND-RAISING.

If you're new to ReadyTalk, here are a few things to know and tips for troubleshooting:

ReadyTalk works best with Chrome, but works with other browsers.

The first time you connect may take a little longer than normal. If possible, try to connect 5-10 minutes before the meeting starts to ensure we can begin on time.

You may connect to audio via your computer or phone; if you join online and dial in on your phone, please mute or turn your computer volume all the way down.

If you have connectivity issues, try refreshing your browser.

General Use Tips:

Register under your name only. If more than one person from your organization is joining the convening session from separate computers, please have each participant register using their own name and contact information.

Mute your phone line when you first call in, and do not place your call on hold at any time during this session. This will help to minimize background noise during the session.

Use the "Raise Hand" functionality in the lower left corner of your screen if you would like to ask a question or provide any feedback.

Use the chat box in the lower left corner of your screen if you are connected to audio via your computer, or if you would prefer to submit comments through that functionality.

This virtual convening session will be recorded and shared with all participants after today's session. If you have any questions about this virtual session, please don't hesitate to reach out.
